

Trailer Coating Guide

UNMATCHED PROTECTION FOR THE LONG HAUL

Reliable Protection for the Tough Roads Ahead

- Coatings that resist corrosion, impact, and abrasion provide heavy-duty durability
- Protecting your trailer from rough roads and heavy loads helps to extend the life of your equipment
- Weather & UV protection preserves color and gloss in extreme weather conditions
- Reliable, American-made solutions from a company with over 75 years of experience in specialty coatings

Performance that Keeps Your Trailer Moving Forward

- Our quick-drying formulations reduce downtime and increase production speed
- With versatile application methods, our products can be easily integrated using spray, dip, or roll-on techniques
- We offer customizable finishes and color options available in various gloss levels, tailored to meet customer needs
- Proven coating technology trusted by top trailer manufacturers for its performance and durability

DURABLE COATINGS YOU CAN TRUST, PERFORMANCE YOU CAN RELY ON

Trailers face harsh conditions like road salt, severe weather, and heavy loads. At NCP Coatings, we understand the challenges trailer manufacturers encounter and offer American-made coatings designed for long-lasting protection. Our solutions provide reliable defense against corrosion, impact damage, and the elements.

Whether for utility, cargo, flatbed, tanker, or specialty trailers, our customized coatings ensure impressive durability and an appealing finish. With various application options, including single-coat and wet-on-wet techniques, our fast-drying products enhance manufacturing efficiency and adhere to steel, aluminum, and composites.

From chassis to panels, our proven solutions keep your trailers looking great and functioning well, even in tough conditions.

Technologies

Primer Systems

Epoxy primers, available in black, grey, and buff, are known for their superior adhesion and long-lasting corrosion resistance, making them an excellent choice for various applications. For heavy-use trailers, we offer a **premium zinc-rich primer** that offers maximum corrosion protection in harsh environments.

Enamel & Direct to Metal (DTM) Systems

DTM Water-Reducible Enamel is a versatile product with various gloss levels and colors, boasting a VOC rating of 3.2. It's designed as a single-coat system for metal surfaces. For quick-cure solution, **DynaGloss Quick Dry Solvent Enamel** is a 5.0 VOC, 1K system used with a primer, available in multiple gloss levels and colors. For a high-end finish, our **NEW DynaGloss DTM High Gloss Enamel** offers a 5.0 VOC rating and can be applied directly to metal surfaces in one coat, available in various colors.

Urethane & High-Performance Systems

DynaThane® DTM Urethane is a high-gloss, 2K system available in all colors, known for its enhanced corrosion resistance whether used with or without a primer. In addition, **AcryHyde® High-Gloss Urethane** is a 2.8 VOC, 2K system specifically designed to deliver exceptional gloss and a high-definition appearance, along with superior transfer efficiency. Both products offer outstanding performance and aesthetic quality for various applications.
